

RAPID PROTOTYPING MADE EASY

ADVANCED EXTRUDER DESIGN

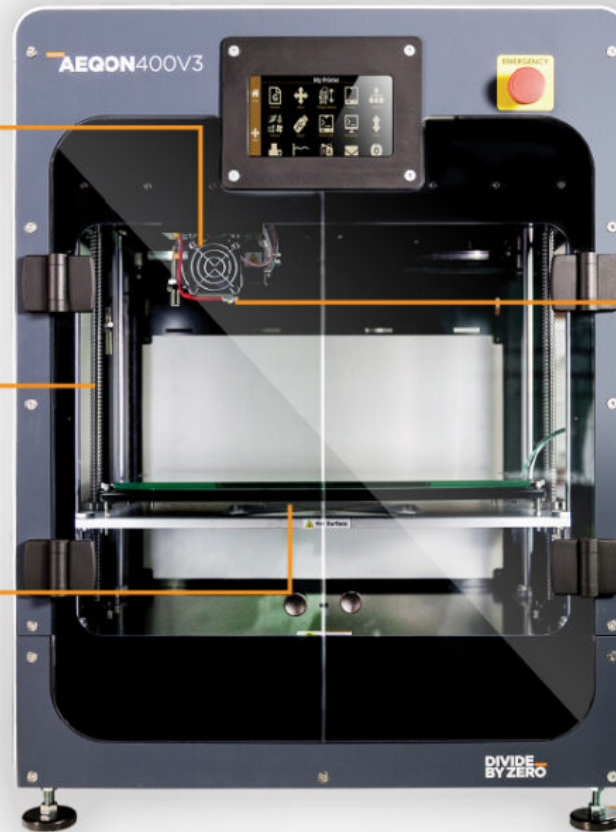

ensures minimum heat creep and enables you to print with 2x deposition rates

HIGH SPEED Z- AXIS DUAL BALL SCREW

screw mechanism that ensures vibration free high precision printing and achieves 25% to 40% better speed

AUTO BED LEVELLING

that improves the quality & component bed adhesion & along unique ability to compensate build surface height irregularities

FUTURE PROOF

machine that can be connected through Wi-Fi, Ethernet and USB and can be accessed through web browser on your desktop

VERSATILE MACHINE

that can print materials like carbon fibre, ABS, Polycarbonate, Polyurethane and can handle various abrasive materials, variable flow & temperature

SMALL FOOTPRINTS

with unique design saves upto 35% space and lets you enjoy similar build platform with huge saving
